### **CariCRIS reaffirms 'good creditworthiness' ratings of Bourse Securities Limited**

<i>CariA</i>	<b>(Regional Scale Foreign Currency)</b>
<i>CariA</i>	<b>(Regional Scale Local Currency)</b>
<i>ttA</i>	<b>(Trinidad and Tobago National Scale Local Currency)</b>

Caribbean Information and Credit Rating Services Limited (CariCRIS) has reaffirmed the Issuer/Corporate Credit Ratings assigned to Bourse Securities Limited (BSL or the Company) at *CariA* (Foreign and Local Currency Ratings) on the regional rating scale and *ttA* on the Trinidad and Tobago (T&T) national scale. These ratings indicate that the level of creditworthiness of this obligor, adjudged in relation to other obligors in the Caribbean and within T&T, is **good**.

CariCRIS has also maintained a **stable** outlook on the ratings. The stable outlook is premised on the high likelihood that BSL will continue to report profitable financial performance in 2026, facilitated by lower operating expenses, notwithstanding lower projected operating income. Additionally, the Company is expected to maintain strong capitalisation levels and maintain its good asset risk profile over the next 12 to 15 months.

BSL's ratings are supported by its good financial performance, underpinned by diverse income streams and strong efficiency levels. Also supporting the Company's ratings is its comfortable risk-adjusted capitalisation, reflected in a strong capital adequacy ratio, good coverage of total assets and low gearing. Furthermore, BSL's asset quality remains strong, supported by a diversified investment portfolio and robust risk management and asset-liability management (ALM) practices, which continue to contribute positively to its solid liquidity profile. However, these rating strengths continue to be tempered by the Company's high reliance on institutional funding to support its business activities. Notwithstanding this concentration, which is characteristic of BSL's business model, the risk remains well managed, and improvements have been noted over the last several years.

### **Rating Sensitivity Factors:**

**Factors that could, individually or collectively, lead to an improvement in the Ratings and/ or Outlook include:**

- An increase in Return on Earning Assets (ROEA) to at least 2.5% sustained for 3 financial years
- An increase in net interest spread to at least 2% sustained for 3 financial years
- An increase in Tangible Net Worth (TNW) to Total Assets to at least 28% sustained for 3 financial years
- Further reduction in its funding concentration risk such that less than 40% of BSL's funding is derived from its top 10 clients for the next financial year

**Factors that could, individually or collectively, lead to a lowering of the Ratings and/ or Outlook include:**

- A deterioration in the credit rating of the sovereign over the next 12 to 15 months
- A decline in ROEA to 1% or less sustained for 3 financial years
- Untimely responses to regulatory/legislative changes
- Funding withdrawals from its top 3 institutional investors without adequate replacements
